EXECUTIVE

High quality combined with pure luxury, these are Starliner motorhomes. All coaches are built to the customer's request where the customer can choose the floor plan, equipment and exterior design. Starliner motorhomes are built with the unique "mono-shell" technique, the structure is manufactured out of one piece fiberglass. All of our motorhomes are without seams or joints. As a result the construction has approximately 30% more torsion strength and because the structure is built of one material, it will not move and crack with temperature changes.

modern designed custom made leather dashboard

variable interior design on customers wish

The Swiss company Maurer Fahrzeugbau AG has been fulfilling our customers' wishes and visions since 1989 and has vast experience in high end motorhomes - our Mission Statement is: "nothing is impossible"!

large bathrooms and comfortable restrooms in various material design

no compromises: king or queen size beds in different lengths and positions

EXECUTIVE

Series 30

Would you like to travel with both flexibility and design in one coach? We have the perfect solution for this: The Starliner SL30 model with an integrated car garage. With our special garage system, we can build a motorhome 26.4 feet in length and put a Smart car inside. The garage systems can be designed for larger cars in longer motorhomes.

revolutionary design: the rear garage has plenty of modern technology

Starliner SL30 RG
rear garage for a Smart car or other
car is possible from 26.4 ft or larger

material, design and colors are
chosen by the customer
we deliver your dream-motorhome

bed lowers if the car is out of the garage: more room for your comfort

no wind noises due to efficient modern design

Our special built Slide-Out system has an air-pressure seal and they are heated around the entire room. All Starliner motorhomes can be used in all four seasons without any concern of water leaks or problems operating the slide rooms. This is a feature that most motorhome manufacturers do not provide in their coaches.

the slide-out is perfectly aligned with the design

specially developed lightening for any living situation

enhanced mobility solutions and wide door on demand

Series 20

efficient room design makes living a pleasure

The Starliner SL20 Motorhomes are built like the SL30 with the unique monoshell technique. The SL20 is built on a special Mercedes Sprinter chassis that is made wider. The cab area of the wider chassis now becomes a part of the living space of the motorhome. The SL20 has the feel of the larger Class A motorhomes including slide out rooms with the economy of a Mercedes Sprinter van.

The whole interior floorplanning as well as the garage systems on the SL20 Motorhome are built especially to the customers request.

Our Mission Statement
"Nothing is impossible"

single or twin beds are possible and allow large storage compartments

high class chassis by Mercedes Benz ensure the best driving experience
